

New directions in learning #SSSCLT

Discover our approach to learning technology and help shape our future work

Are you involved in workforce development or using learning technologies in your workplace?

We're actively engaged in developing new learning solutions with a digital focus and supporting employers, workers and other stakeholders to use technology-based learning and development solutions.

We need your help to put learning technology into the hands of Scotland's 200,000 social service workers at one of our sessions in Edinburgh and Glasgow.

As well as being able to shape our future work, you'll get 'hands on' demonstrations of our new:

- interactive resource to help people avoid common pitfalls relating to their fitness to practice
- range of apps for Android tablets
- Open Badges platform.

Our free events run from **10.00am** to **1.00pm**. Book early as places are limited.

- Thursday 2 June 2016, Glasgow
- Tuesday 28 June 2016, Edinburgh

These are bring your own device (BYOD) events and you are encouraged to take your own laptop, tablet or smartphone. Free WiFi will be available.

Book now via EventBrite
